Find Your Leviev Ring Size

A precise printable guide for measuring an existing ring or your finger.

PRINT AT 100% / ACTUAL SIZE. DO NOT USE FIT TO PAGE.

Verify both calibration marks before measuring.

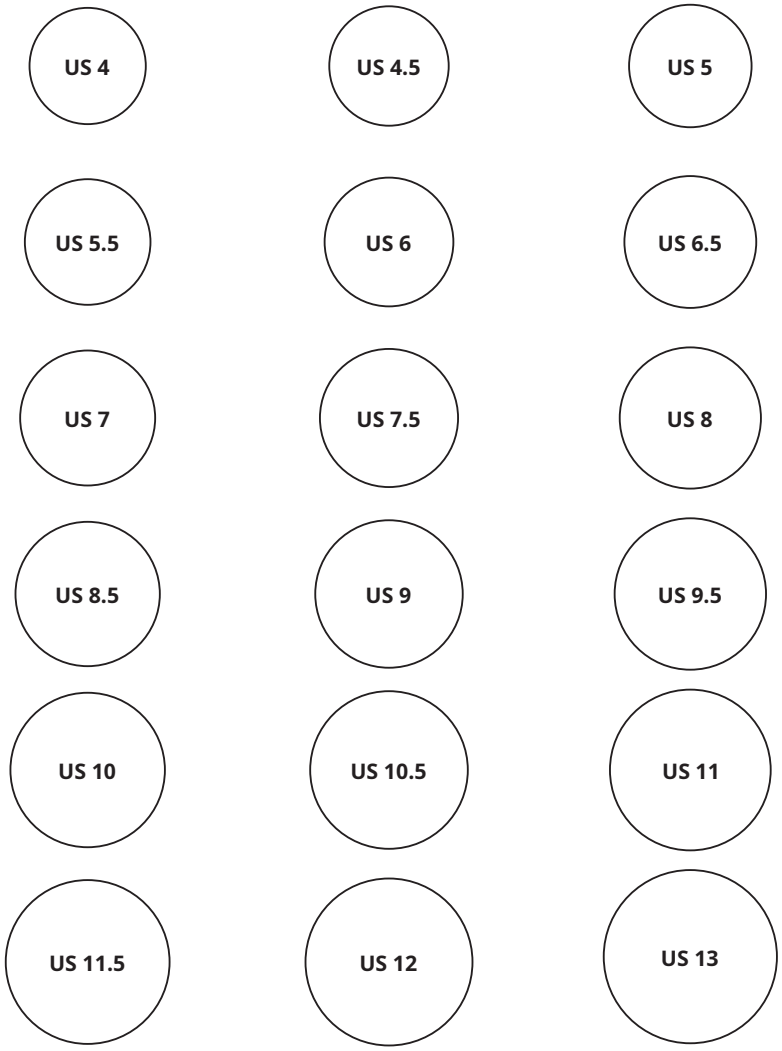

50 mm

2 inches

01 Measure an Existing Ring

Place a ring over the circle. Match its inside edge exactly to the black outline.

If it falls between two sizes, choose the larger size.

FIT NOTES

Measure late in the day, when fingers are at their largest.

Cold temperatures may reduce finger size; warmth may increase it.

If you are between sizes or choosing a wide band, consider the larger size.

02 Measure Your Finger

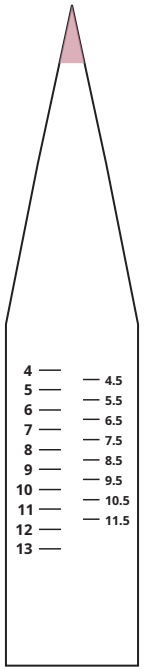

Cut out the strip along the outline.

Wrap it snugly around the base of your finger.

Overlap the pointed end over the size scale.

Read the US size where the tip meets the scale.

TAPERED TIP

OVERLAP & READ AT TIP

Overlap the tapered tip onto the scale after wrapping.

Read the US size where the tapered tip lands.
